

# CERTIFICATE

## on naming of minor planet

The Minor Planet Center  
Smithsonian Astrophysical Observatory, Cambridge, MA 02138, U.S.A.,  
the head of the international program of minor planet research  
does hereby proclaim, that a minor planet (22616)= 1998 KG7  
which had been discovered by the Lowell Observatory Near-Earth Object Search  
at the Anderson Mesa Station is named as

# BOGOLYUBOV

in honor of

**Nikolai Nikolaevich Bogolyubov**  
(1909–1992)

Official Communication  
of the International Astronomical Union:

22616) Bogolyubov = 1998 KG7

Discovered 1998 May 23 by the Lowell Observatory Near-Earth Object Search  
at the Anderson Mesa Station.

**Nikolai Nikolaevich Bogolyubov** (1909–1992) was a Russian and Ukrainian Soviet mathematician and theoretical physicist known for his work in statistical field theory and dynamical systems. He was awarded the Dirac Medal in 1992. The name was suggested by K. I. Churyumov.

Minor Planet Circular № 67760 2009 DEC. 2

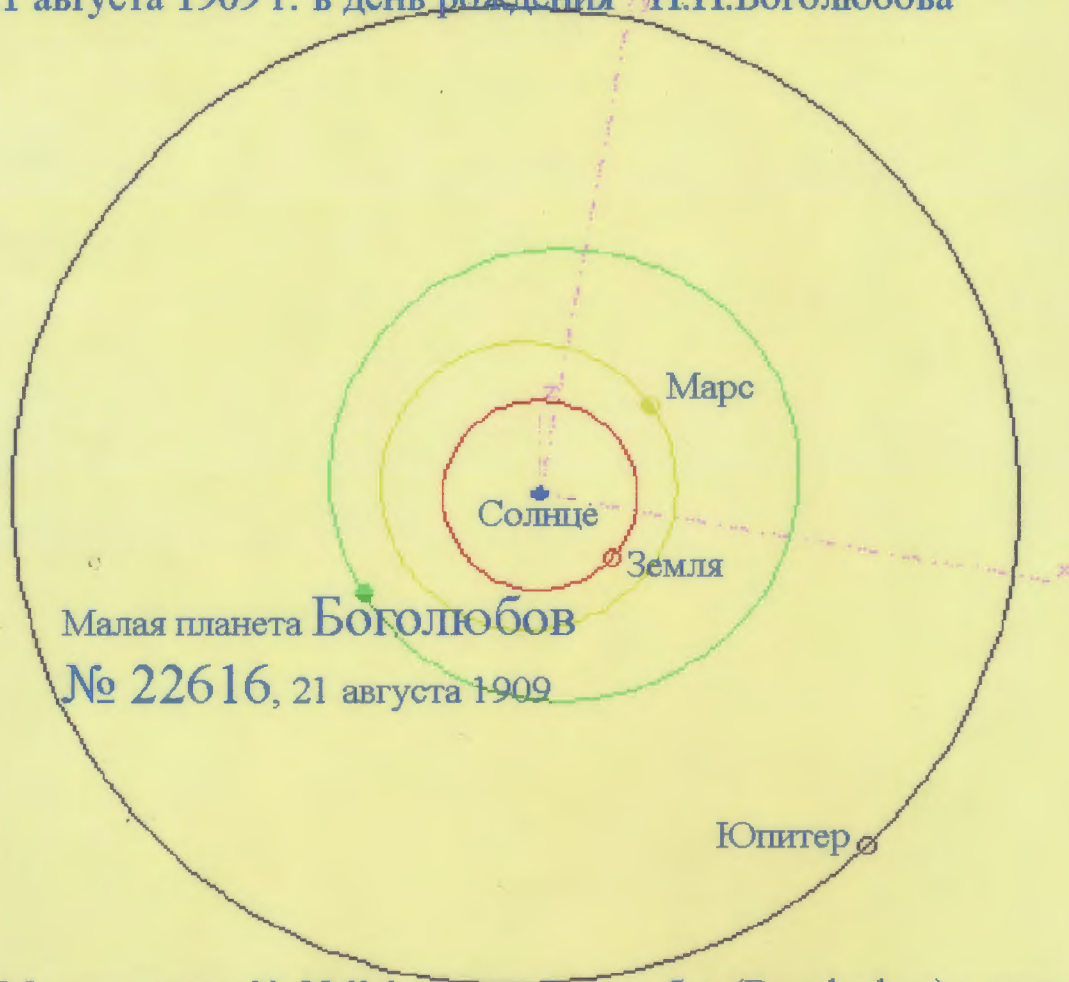

Director of the Minor Planet Center

Brian Marsden

*С. Solis motum fixarum libere immobilitis.*  
*Септис ато. XXX. генобуит*

Положение малой планеты № 22616 Боголюбов на орбите  
21 августа 1909 г. в день рождения Н.Н.Боголюбова

Малая планета **БОГОЛЮБОВ**  
№ 22616, 21 августа 1909

Малая планета № 22616 названа Боголюбов (Bogolyubov) в честь выдающегося математика и физика Н.Н.Боголюбова (1909-1992)
